I am currently a senior at the University of Florida in the Department of Religion with a effervescent passion for creating beautiful products and sharing these with the community. I am deeply interested in incorporating healthcare with technology utilizing a humanistic approach and putting patients first. My background in public speaking, healthcare, religion as well as a being a member of the tech community in Florida gives me a unique perspective on how to: (1) understand the needs of a community on a cultural and health-centered level, (2) implement these ideas by way of beautifully-designed digital mediums and graphics, and (3) then communicate these ideas with the general public with excitement and passion.

Education

University of Florida
Bachelor's of Arts
Religion
Minor:
Educational Studies
2016

College of Central Florida
Associate of Arts
Nursing
2014
